ABOUT ME

- Dedicated and ambitious second-year with a keen interest in technical field. Eager to channel my academic foundation into practical experiences and skill development.
- As a second-year engineering student, I have developed foundational knowledge in both front-end and back-end development. My skill set includes programming languages like C, Python, and PHP, which I've been exploring in my coursework. I'm also getting hands-on experience in web development using ReactJS and database management with MySQL

CERTIFICATIONS

- **Certification in Python:** Successfully completed an accredited online Python programming course, demonstrating proficiency in core language concepts, data manipulation, and problem-solving. Received hands-on experience in developing Python applications and scripts
- **Generative AI by Microsoft & LinkedIn:** I have successfully completed the Generative AI program offered by Microsoft and LinkedIn, further enhancing my proficiency in artificial intelligence and machine learning.
- **React.js:** I have demonstrated the ability to create responsive and engaging web applications that deliver seamless user experiences.

TECHNICAL SKILLS

- **Programming Languages**
 - C/C++
 - Python
- **Frameworks & Libraries & Environments**
 - HTML, CSS, Bootstrap, PHP, ReactJS
- **Version Control and Databases**
 - GitHub
 - MySQL
 - XAMPP

SOFT SKILLS

- Communication (Verbal & Written)
- Teamwork and Collaboration
- Problem Solving
- Time Management

EXTRA CURRICULAR

- Participated in **Smart India Hackathon 2023**
- **Participated** in various Startup Entrepreneurships Innovation Clubs
- Event Co-Ordinator of various events at school level.

EDUCATION

B.Tech. CSE (Data Science) - CGPA: 9.05

GH Raisoni College of Engineering - Pune

📅 2022

📍 Pune, Maharashtra

Higher Secondary - A

Maharashtra State Board of secondary Education - HSC

📅 2022

Secondary - A+

Maharashtra State Board of Secondary Education - SSC

📅 2020

PROJECTS

[Think Yours](#) 🔗

- **Skill Set:** *Web-Hosting* | *DNS* | *GitHub*
- Hosted the website using GitHub static server.
- I hosted my website on GitHub Pages, using a repository. After activating GitHub Pages, I bought a custom domain and configured DNS settings to point to GitHub.
- By adding the custom domain in repository settings, my website became accessible at the custom domain.

[Spotify Clone Web](#)

- **Tech Stack:** *HTML* | *CSS*
- I developed a simplified Spotify clone using HTML and CSS, focusing on creating a user-friendly layout and design.

[Python Mini Project: Gender Recognition](#)

- **Tech Stack:** *Python* | *Open CV Libraries*
- I developed a mini project for gender recognition using Python libraries. Leveraged libraries like OpenCV and scikit-learn to preprocess images, extract facial features, and train a machine learning model.
- Successfully built an accurate gender classification system that analyzes facial attributes to predict gender with efficiency.

[Hotel Management Portal](#)

- **Tech Stack:** *PHP* | *MySQL* | *XAMPP Server* | *Ajax*
- **Real-Time Booking:** Experience the convenience of real-time booking updates for enhanced efficiency
- **Check-In and Check-Out Control:** Streamlined administration for seamless guest arrivals and departures.
- **Admin Panel Access:** Efficiently manage hotel operations through a user-friendly admin interface.
